

TRITON DTS SPINAL DECOMPRESSION

My name is Dr. Will Vargo DC. I'm a Back and Neck Pain Specialist certified in Spinal Decompression. My practice is fully dedicated to helping people with exactly the same, painful situation you are experiencing. People just like you come to my office every day with back and/or neck pain – many are frustrated, angry, feeling lost and hopeless. Yet in the overwhelming majority of cases, our patients leave pain free in a matter of only a few sessions, due to this recent cutting edge technology.

The Wilshire Chiropractic Institute is one of only a few Spinal Decompression Back And Neck Pain Correction Centers in the entire greater Southern California area. Not too long ago, you had to go to certain hospitals to receive this kind of treatment. Many doctors don't even know about the technologically advanced treatment that we use here. Many of the doctors that do know of our service find it better to refer their patients needing our treatment to us than invest their precious time and resources into changing their practice to become like ours, which is the specialization of spine and disk related care.

If you have been told that “you must learn to live with the pain...” But, you don't want to live this way anymore, this may be exactly what you need.

You may have been suffering with back or neck pain for months or even years. Forget about the crazy promises and weird solutions you got off the late night infomercial's... or the, “you will probably be on a walker in a few years” diagnosis many doctors, that are not utilizing this technology, are forced to tell you. They are actually telling you the truth... as far as they know, if you follow what they say, because they may not have studied this latest technology in back and neck pain correction.

FIX THE PROBLEM, NOT THE SYMPTOM!

We can stop the pain fast by finding out what's really causing the problem, then fixing that problem! When it comes to back pain, or neck pain, herniated or bulging discs, as well as arm and leg pain, our technology focuses directly on the root cause of the problem... that compressed spinal disc, and/or pinched nerve. By focusing on restoring the function of the area causing the compression, as well as restoring the life of the disc, we can get your body back into a healing state instead of the chronic state of inflammation you have grown accustomed to. This chronic inflammation and irritation is why you have the daily pain.

Back problems will not be eliminated by drugs!

Pain killers simply shut off your brain from feeling your pain. They tell your brain not to acknowledge the pain, however, the damage is still there, and your brain just doesn't feel it. This fools or deceives you into doing things you wouldn't normally do, and can actually make it worse. Pain killers, muscle relaxers or anti-inflammatories are not good for you. Before you choose to take another pill or even decide to start if you haven't already, find out what's causing that pain.

With This New Technology, You May Feel Permanently Better Within A Few Weeks!

Stop suffering like you are right now! The pain is interfering with your quality of life, stopping you from participating in the activities you enjoy, and virtually ruining your zest for life. Whether it is a night out with the family, or a day to spend at home with the kids, every day is ruined due to your low back or neck pain.

I realize you may not have a degree in anatomy, so imagine if you will, your spinal column as a stack of building blocks, which is the center of your skeletal structure. It is your backbone! Each individual vertebra is designed to be freely movable and is required to stay that way so the delicate

nerves that control ALL functions of your body may exit the spinal cord and innervate their intended cell or tissue; this is how your body maintains order and health.

For us to be alive and healthy requires a brain to give orders to all the cells of all the tissues of all organs of the body. Additionally the brain organizes each organ and/or tissues of the body to work in harmony with other organs to perform a specific function... like digestion, breathing, etc. A good example is the nervous system. Can you begin to see the importance of our nerves?

Without proper nerve supply you can develop a health disorder, because the harmony of the body will be affected when the nerves have altered function. I call health the normal expression of a body working in harmony, or order. Sickness is an expression of the body working in dis-harmony... Or dis-order. I am sure you have even heard references to sickness as a “health disorder”.

To maintain proper health we must maintain a healthy nervous system... This is where the spine and disks come into importance... and why it is not wise to ignore or cover up or only treat pain...

Pain is nature's warning that something is wrong!

Most doctors won't tell you this, quite frankly it seems they would rather give you a pill, potion or lotion to cover your pain, until it becomes so bad that they admit you into the hospital! You may be on that most common approach now, that is followed by most back pain sufferers... the road to back surgery!

If this pain pill, to physical therapy, to steroidal injection, to more therapy, to surgery approach worked, then back pain would not be the second highest complaint all doctors hear, would it? They would be fixed as a result of these modern medicines..... Well then, why are you still suffering?

SPINAL DECOMPRESSION IS COMFORTABLE, SAFE, AND EFFECTIVE

You are placed in a very comfortable position, lying either face up or face down, or on your side, depending on what is needed. We then program the computer to a setting based upon what is shown on x-ray images and our examination. MRI's are not necessary, and generally are only about 10% accurate according to my Spinal Decompression certification training. (They are, however, good money makers for the doctors and hospitals that order them.) Our findings will dictate the specific angle and level of decompression, allowing us to target specific discs that are causing your pain and other symptoms.

Our patients are quite happy with the treatment, describing it as gentle and painless. Many have actually fallen asleep during treatment! Often patients see substantial relief after only a few treatments.

The treatment fees at the Wilshire Chiropractic Institute are affordable and we have payment plans to make your life easier if you need them.

Make an appointment to see if we can help you!
